

# Heavy Duty Pallet Racks

At the heart of most Store and Space structures is our famous Omega column design. Each upright is fully bolted using heavy-duty square tube bracing and base plates to ensure structural integrity and to eliminate installation delays and costs inherent in bolt-together uprights. In addition sections, we offer structural steel shapes in a virtually unlimited selection of sizes and capacities to meet your requirements. Store and Space offers a wide variety of column and beam profiles in various gages to provide our customers with the most efficient solutions possible. All uprights, beams and support components are engineered to maximum load capacities while minimizing weight to reduce cost.
